

To Whom It May Concern,

I'm writing to urge you to reject NAB's petition 04-160 regarding services provided by satellite radio. Please let the market (i.e. paying customers) determine what services they find of value rather than to allow the "establishment" dictate how/what satellite radio providers offer to their listeners.

I would point out the television equivalent of The Weather Channel on cable networks vs. the local weather channels. There seems to be room for both in the television market...why not on the radio?

I would also like to point out that if NAB was meeting the needs of it's listeners...XM and other satellite radio providers would be belly-up by now. Clearly there is a need as determined by paying subscribers -- please allow XM and others to serve their customers as they best see fit.

Thanks in advance for your time.

Regards,

Stephanie Coon
